

Infertility Treatment		Self-pay
Initial examination by the doctor		€150
Cycle Monitoring	Consultation with a doctor, including ultrasound examination, preparation of the stimulation protocol if necessary, and ovulation induction.	€100
IUI	Intrauterine insemination, including cycle monitoring, ultrasound examination, and sperm preparation using the swim-up method.	€270
IUI + MSS	Intrauterine insemination, including cycle monitoring, ultrasound examination, and sperm preparation using the microfluid sperm sorting (MSS).	€490
IUID	Intrauterine insemination with donor sperm, including cycle monitoring, ultrasound examination, and sperm preparation using the swim-up method.	€540
IVF cycle + ET	Preparation of stimulation protocol, ultrasound monitoring during stimulation, egg retrieval under general anesthesia, sperm analysis and processing by swim-up or density gradient, insemination of the eggs, embryo culture within 48 hrs, first embryo transfer.	€1,300
FET	Preparation of the protocol, thawing and transfer of a previously frozen embryo (cryoembryo transfer).	€490
PRP Application into the Uterine Cavity	Application of platelet-rich plasma (PRP) into the uterine cavity to support endometrium regeneration and improve embryo implantation.	€290
Immunotherapy Injection	Subcutaneous administration within 30 minutes. The price does not include the cost of the administered medication.	€70
Infusion Therapy Indicated by an Immunologist	Up to 120 minutes – the price does not include the prescribed medication.	€120
IVF cycle without ET	Stimulation protocol preparation, ultrasound monitoring, egg retrieval under anesthesia, sperm processing, insemination, and 48h embryo culture.	€950
IVF natural/mild cycle + ET	Stimulation protocol preparation, ultrasound monitoring, egg retrieval without anaesthesia, sperm processing, insemination, 48h embryo culture, and first embryo transfer.	€950
IVF natural/mild cycle without ET	Stimulation protocol preparation, ultrasound monitoring, egg retrieval without anaesthesia, sperm analysis and processing, egg insemination, and 48h embryo culture.	€750
IVF cycle without yield of oocytes		€500
Cancellation of IVF cycle prior to ovarian puncture	Cancellation of the cycle during stimulation, prior to oocyte retrieval.	€270
Comprehensive laboratory examinations within the IVF cycle	With each hormonal stimulation prior to oocyte retrieval: hormonal tests for the female partner and STD screening for both partners.	€200
Donor Programme		Self-pay
DIVF STANDARD	Selection of the donor by the coordinator based on the couple's physiognomy and blood groups, guarantee of 6 mature donor oocytes, processing of a fresh sperm sample using the swim-up method, fertilisation of oocytes by ICSI, culture in a time-lapse incubator until day 6, freezing of the first embryo, one embryo transfer, guarantee of one embryo.*	€5,000
DIVF OPTIMAL	STANDARD program + sperm separation by MFSS or MACS, EmbryoGlue application during embryo transfer, LAZH (first transfer) if indicated, freezing of the first two embryos, guarantee of two blastocysts, laboratory tests required within the cycle (STD), sperm cryopreservation, freezing of 2 embryos, guarantee of 2 embryos.*	€6,800
DIVF PREMIUM	OPTIMAL program + guarantee of 8 oocytes (Halosperm test for the partner included), genetic matching of the donor and recipients (testing of approximately 280 mutations), one-year embryo storage included.*	€7,800
Guarantee of a higher number of oocytes	Increase in the number of mature oocytes by 2 in any DIVF package.	€250
4 additional eggs in any DIVF	Guarantee of an additional 4 mature oocytes in any DIVF package.	€500
Donor Sperm	Sperm from a donor - donor selection, thawing of donor sperm.	€270
Donor Sperm Reservation	Reservation/extension of donor sperm storage for 1 year.	€150
DEM	Donor Embryo Transfer, preparation of the stimulation protocol, ultrasound monitoring, frozen embryo transfer (FET) of a donor embryo at the blastocyst stage.	€1,950
DEM + PGT-A	DEM with transfer of a genetically tested euploid donor embryo at the blastocyst stage.	€2,500
Donor Embryo Reservation	Reservation/extension of donor embryo storage for 1 year.	€150

* Blastocyst Guarantee only in case of sperm concentration at least 10 mil/ml, progressive motility over 20%, morphologically normal sperm at least 4%, sperm DNA fragmentation less than 20%, and partner age under 50 years.

Cryopreservation of gametes and embryos		Self-pay
Social freezing	Egg freezing without medical indication: consultation, preparation of a stimulation protocol, ultrasound monitoring during stimulation, egg retrieval under general anaesthesia, freezing of eggs on 3 straws (up to 9 eggs), and storage for 1 year.	€1,600
Medical freezing	Egg freezing based on medical indication*: consultation, preparation of a stimulation protocol, ultrasound monitoring during stimulation, egg retrieval under general anaesthesia, freezing of all mature eggs, and storage for 1 year.	€1,600
Thawing of eggs	Thawing of cryopreserved eggs before their fertilization.	€290
Freezing of the first embryo		€220
Freezing of eggs during IVF	Additional charge for the IVF cycle if the patient decides not to fertilize all eggs, 3 straws (max. 9 eggs).	€520
Additional straw – eggs/ embryos	A maximum of two embryos or three eggs per straw.	€90
Sperm freezing	The price does not include the necessary serological STD testing for the patient.	€220
Sperm freezing as part of infertility treatment	The price does not include the necessary serological STD testing for the patient.	€110
Sperm freezing for medical reasons	Freezing of sperm prior to oncology treatment, including storage for 1 year. The price does not include the necessary serological STD testing for the patient.	€110
Storage in the cryobank for 1 yr	Storage or extension of storage of biological material (embryos/eggs/sperm/biopsy sample/testicular tissue) in the cryobank for each year commenced.	€160
Storage in a quarantine container for 1 year	Storage or extension of storage of biological material in a quarantine container in the cryobank for each year commenced.	€200
Re-vitrification of an embryo	Re-freezing of a thawed embryo.	€110
Laboratory Methods		Self-pay
Sperm Separation Methods	Magnetically Activated Cell Sorting (MACS) or Microfluidic Sperm Sorting (MSS).	€330
ICSI-3	Intracytoplasmic Sperm Injection of 1 to 3 eggs.	€330
ICSI-12	Intracytoplasmic Sperm Injection of 4 to 12 eggs.	€550
ICSI+	Intracytoplasmic Sperm Injection for each additional egg over 12 – additional charge.	€35
IMSI	Intracytoplasmic Morphologically Selected Sperm Injection – additional charge for ICSI.	€160
PICSI	Sperm selection via hyaluronan binding – additional charge for ICSI.	€160
SpermMobile	Activator for immotile sperm prior to ICSI if needed.	€130
Oocyte activation	After ICSI if needed.	€150
Polarised Light Microscopy	Method for assessing egg maturity.	€330
Individual embryo culture	Culture of embryos in a separate chamber within a multi-room incubator.	€220
Extended embryo culture	Extended embryo culture beyond 48 hours, typically to the blastocyst stage.	€320
Extended embryo culture with TimeLapse (EmbryoScope+)	Extended embryo culture in a specialised incubator ensuring continuous monitoring while maintaining a stable environment.	€700
LAZH / LATZ	Laser-assisted zona hatching or thinning.	€220
EmbryoGlue	A medium enriched with hyaluronic acid, designed to support embryo implantation.	€250
LAZH / LATZ + EmbryoGlue		€350

* Medical indication includes egg freezing in case of a diagnosis of breast cancer or lymphoma by an oncologist.

GYNCARE Price List

Valid from 1st April 2026

Diagnostics		Self-pay
STD screening	Testing for sexually transmitted diseases (HIV, syphilis, hepatitis B and C).	€50
Blood collection		€10
Female Diagnostics		
Ovarian reserve assessment	AMH concentration test in blood and ultrasound evaluation of antral follicle count.	€60
Ultrasound	Gynaecological ultrasound examination including folliculometry.	€40
HyFoSy/HyCoSy	Ultrasound examination of fallopian tube patency.	€200
uNK Test	Endometrial aspiration and analysis of uterine natural killer cells.	€240
Intracellular cytokines	CD3+IFN-g, CD3+ IL-4, CD3+ TNF-a, CD4+ IFN-g, CD4+ IL-4, CD4+ TNF-a, CD4+ IL-17.	€90
BeREADY Test	Analysis of endometrial receptivity.	€700
beREADY Test + InvisibleMi - Endometrial Analysis	Endometrial receptivity testing and endometrial microbiome analysis.	€950
beREADY test + InvisibleMi - Endometrial and Vaginal Analysis	Endometrial receptivity testing, endometrial and vaginal microbiome analysis.	€1500
InvisibleMi - Endometrial Microbiome Analysis	Endometrial microbiome testing	€400
Endometrial Biopsy	Endometrial aspiration for diagnostic purposes.	€100
Postcoital Test	Assessment of sperm penetration from ejaculate into cervical mucus.	€60
Male Diagnostics		
BASAL Semen Analysis	Basic semen analysis under microscope.	€45
BASAL CASA Semen Analysis	Basic semen analysis using CASA (Computer-Assisted Sperm Analysis).	€60
OPTIMAL Semen Analysis	Semen analysis using a CASA system + sperm DNA fragmentation testing.	€180
PREMIUM Semen Analysis	Semen analysis using a CASA system + sperm DNA fragmentation testing + oxidative stress assessment in ejaculate.	€270
Antisperm Antibodies Test	Testing for antisperm antibodies in the ejaculate.	€55
CatSper Test	Functional assessment of sperm activation.	€70
Trial-wash Test	Assessment of sperm quality after preparation for assisted reproduction.	€55
Additional Consultations Options		Self-pay
Comprehensive consultation services for IVF - Slovak lang.		€150
IVF Consultation - Coordinator	Couple consultation with the coordinator in a language other than Slovak (at the patient's request).	€100
IVF Consultation - Doctor	Initial and follow-up examination with evaluation of results by a urologist/andrologist.	€200
Urological/andrological examination	Immunological, Urological or with an Internist.	€150
Consultation	Psychological consultation.	€70
Consultation	Immunological consultation.	€70

GYNCARE Price List

Valid from 1st April 2026

Genetics		Self-pay
Initial consultation	For couples with reproductive disorders, the fee is charged once.	€100
Consultation of genetic test results	Consultation of pathological results of genetic examination by a clinical geneticist with a proposal for further steps.	€60
BASAL Genetic Testing Panel - Individual / Couple	Panel diagnostic analysis of genes associated with infertility treatment (genes for CF, SMA, hereditary hearing loss, phenylketonuria, fragile X in women/AZF in men, thrombophilic conditions, ANXA5, FSH and LH receptor polymorphisms, PLK4).	€450/850
OPTIMAL Genetic Testing Panel - Individual / Couple	Carrier testing of recessive genetic mutations in 110 of the most common monogenic diseases.	€600/1200
INFERTILITY Genetic Testing Panel - Individual / Couple	Panel diagnostic analysis of 50 genes related to female infertility and 70 genes related to male infertility.	€650/1200
PREMIUM Genetic Testing Panel - Individual	The OPTIMAL Genetic Testing Panel together with the INFERTILITY Genetic Testing Panel.	€1,100
PREMIUM Genetic Testing Panel - Couple	The OPTIMAL Genetic Testing Panel together with the INFERTILITY Genetic Testing Panel.	€2,100
Cytogenetic testing	Analysis of whole chromosomes or long lengths of DNA to identify large-scale changes.	€220
GenomeScreen	Whole genome sequencing.	€380
Sanger Sequencing	Testing of a known variant in a gene – 1 fragment.	€55
DNA Isolation	Extraction of DNA for molecular genetic analysis.	€35
Thrombophilia Testing	Price for testing 1 mutation out of 4 (mutations: FV Leiden, FII Prothrombin, MTHFR C677T, MTHFR A1298C).	€45
CFTR gene testing	Panel carrier testing for cystic fibrosis (64 most common mutations).	€420
FMR1 gene testing	Carrier testing for Fragile X syndrome.	€490
AZF Test (AZFa, AZFb, AZFc)	Detection of microdeletions on the Y chromosome in male infertility factor.	€170
Testing of FSHR and FSHB polymorphisms	Detection of single nucleotide polymorphisms in the gene for the FSH receptor and its β -subunit of FSH (rs6165, rs6166, rs1394205, rs10835638).	€180
Testing of the ANXA5 gene	Genetic analysis of haplotypes in the ANXA5 gene.	€110
MLPA SMA	Carrier testing for spinal muscular atrophy.	€205
QF-PCR Complete	Analysis of aneuploidies of chromosomes 13, 18, 21, X and Y.	€260
QF-PCR Extend	Analysis of aneuploidies of chromosomes 13, 15, 16, 18, 21, 22 and X and Y.	€490
DHCR7 gene testing	Smith-Lemli-Opitz syndrome – sequencing analysis of 9 exons.	€475
Preimplantation Genetic Testing		
Biopsy of up to 5 embryos	Collection of trophectoderm cells for preimplantation genetic testing of 1 to 5 embryos.	€450
Biopsy of an additional embryo	For each embryo over 5.	€50
PGT-A + PGT-SR (per embryo)	Analysis of chromosome number and unbalanced chromosomal translocations in a single embryo.	€450
PGT-A Plus - preparation	Sample preparation for PGT-A Plus testing.	€850
PGT-A Plus (per embryo)	Chromosome count analysis, including identification of congenital and developmental abnormalities in the embryo, and determination of the parental origin of aneuploidies.	€450
PGT-M - karyomapping	Analysis of reference samples and preparation for monogenic disease testing of embryos using karyomapping.	€1,650
PGT-M (per embryo)	Testing for monogenic diseases in a single embryo.	€400
PGT-M – Direct Mutation Detection	Surcharge for direct mutation detection using the karyomapping method, in cases where obtaining a reference sample is not possible.	€600
CD138 examination		€120
AA/Bx haplotype testing		€150
HLA-C1/C2 genotype testing		€250

GYNCARE Price List

Valid from 1st April 2026

Prenatal Genetic Screening Tests		
TRISOMY test	Down syndrome (trisomy 21), Edwards syndrome (trisomy 18), Patau syndrome (trisomy 13), and probable fetal sex.	€350
TRISOMY test XY	TRISOMY test + screening for aneuploidy of sex chromosomes X and Y.	€390
TRISOMY test +	TRISOMY test XY + screening for selected chromosomal deletions.	€450
TRISOMY test Complete	Screening of all 23 pairs of fetal chromosomes.	€530
TRISOMY test Complete + CF	Screening of all 23 pairs of fetal chromosomes + detection of the most common mutation causing cystic fibrosis.	€590
TRISOMY test Complete + SLOS	Screening of all 23 pairs of fetal chromosomes + detection of the most common mutations causing Smith-Lemli-Opitz syndrome.	€635
TRISOMY test Complete + CF + SLOS		€695
RhD - NIPT	Genetic testing of the fetal Rh factor from the mother's blood.	€140
BabyGen	A non-invasive test to determine the baby's sex from a maternal blood sample.	€123
Amniocentesis	Amniotic fluid collection for fetal genetic testing.	€160
Day Surgery		Self-pay
Anaesthesia for procedures up to 30 minutes		€100
Anaesthesia for procedures over 30 minutes		€150
Choice of specific surgeon		€100
Female		
Hysteroscopy	Diagnostic/Operative.	€450
Hysteroscopy (Myomectomy)	Resection uterine fibroids.	€650
Cyst Aspiration	Aspiration of an ovarian cyst under ultrasound guidance.	€200
Cervical Conization		€480
Removal of Cervical Polyp		€400
Curettage of the Uterine Cavity		€450
Uterine Cavity Revision	After a spontaneous abortion.	€450
Genetic testing of a miscarried fetus		€490
Excision of the Vulva or Vagina		€450
Application of PRP into the Ovaries	Including general anaesthesia.	€600
Male		
MESA/TESE	Microsurgical sperm retrieval from the testicle or epididymis.	€700

Gynaecological Clinic		Self-pay
Consultation	Repeated consultation or second opinion.	€80
Gynaecologica examination	At the patient's request.	€40
Insertion of IUD	Insertion of an intrauterine device.	€40
Cervical cytology smear – slide		€25
Cervical cytology smear – LBC	Liquid base cytology.	€50
Administration of medication i.m./s.c.	At the patient's request.	€25

Other Services		Self-pay
Transportation of biological material - Slovakia	Administrative fee for preparing the documentation for the transportation of biological material from a tissue facility in Slovakia (over 30 km).	€250
Transportation of biological material - EU	Administrative fee for preparing the documentation for the transportation of biological material from a tissue facility within the European Union.	€600
Transportation of biological material – outside the EU	Administrative fee for preparing the documentation for the transportation of biological material from a tissue facility outside the European Union.	€900
Postage Abroad	Recorded delivery.	€20

Discounts for UNION Health Insurance Policyholders	
€100 for PREMIUM Semen Analysis	The contribution can be used only once.
€200 for ICSI	Upon meeting the indication criteria.
€900 for PGT of embryos	Including biopsy. Applicable only if the test is indicated by a geneticist.

Prices of the respective procedures indicated in the price list are final.

The cost of donor programs does not include the expenses for the recipient's medication or the examinations of the couple recommended by the doctor, whether performed at the GYN CARE clinic or elsewhere.

Payment for the use of donor sperm for the fertilization of the recipient's oocytes, or for insemination with donor sperm, must be made on the day of the procedure, before it is carried out.

A deposit of €2,500 for IVF treatment with donor oocytes is required to be paid at the time of donor reservation.

The full price for the selected treatment will be credited to the GYN CARE's account no later than the day of oocyte retrieval from the donor.

Payment for treatment with donor embryos must be made no later than the day before the transfer of the donor embryo.
